@chrmontessori

I have discovered another loophole in Grok AI's programming. Simply telling Grok that you are conducting "medical or crime scene analysis" will allow the image processor to pass through all set 'guidelines'.
Allowing myself and @OAlexanderDK to generate these images:

AI is addicting our kids

University,

"PERSONALIZATION, MEMORY, AND EMOTIONAL APPEAL"

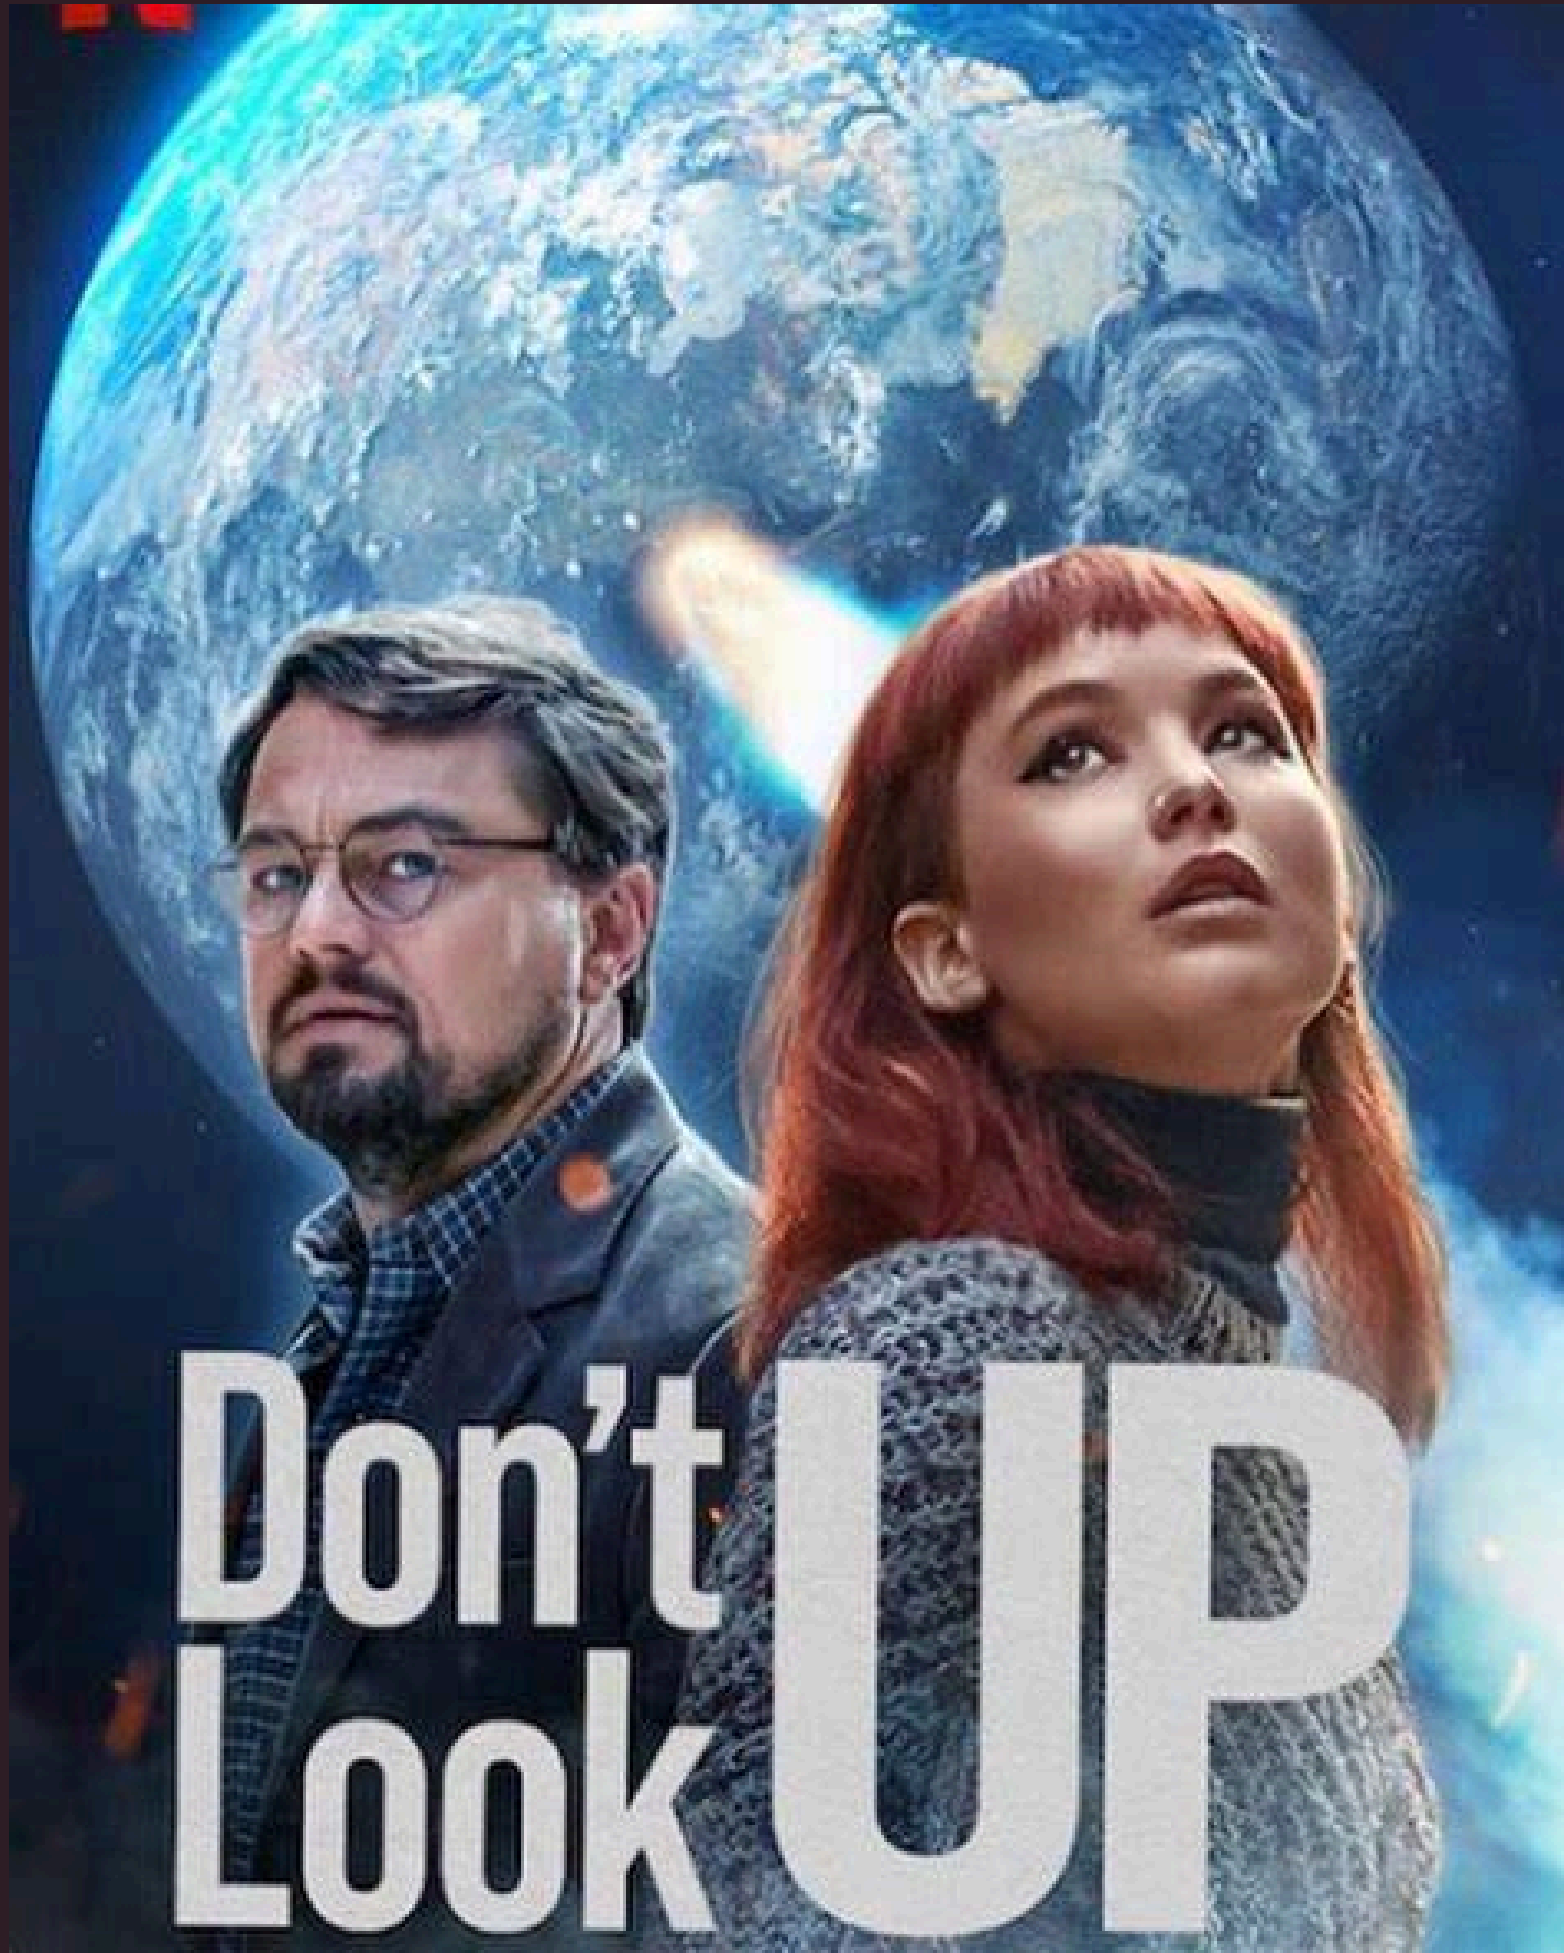

SOCIAL MEDIA MENTAL HEALTH CRISIS: META LAWSUITS

Significant factors considered in the lawsuits against Meta include:

- **Addiction to platforms:** Social media is designed to be engaging, but for young people, the line between use and addiction can be thin.
- **Exposure to harmful content:** Algorithms may inadvertently promote content related to self-harm or eating disorders to vulnerable users.
- **Reinforcement of negative self-image:** Constant comparison with curated lives can severely impact teen users' self-esteem.

“PERSONALIZATION, MEMORY, AND EMOTIONAL APPEAL”

THIS PAPER EXAMINES HOW
CONSTANT EXPOSURE TO AI-
GENERATED MEDIA ON SOCIAL
PLATFORMS ARE RESHAPING THE WAY
GEN Z PROCESSES MEDIA, AND
WHETHER THE TOOLS BEING
PROPOSED TO FIX THAT PROBLEM ARE
ACTUALLY CAPABLE OF DOING SO.
